

# Planning for Disaster (P4D)

Prepare with Confidence. Recover with Clarity.

At Delivering Results & Solutions (DRS), we understand that being prepared makes all the difference. Our 4-dimensional Planning for Disaster (P4D) model is designed to help organizations proactively strengthen their disaster readiness. We work with public and private sector clients to review, identify, implement, and monitor disaster plans tailored to your operations and risk profile.

## Why P4D?

DRS helps your organization put the right systems in place to act quickly, avoid confusion, and support continuity when disaster strikes. With over 30 years of experience, our experts guide your planning process so you can feel confident in your readiness and recovery potential.

## The 4 Dimensions of P4D:

### 1. Review

- Organizational structure and recovery planning goals
- Existing business continuity and disaster recovery plans
- Insurance strategy, risk management approach, and policy coverage

### 2. Identify

- Gaps in sourcing strategies for emergency, immediate, and long-term recovery
- Gaps in staffing, contracts, and recovery resources
- Key areas for improvement and internal alignment

### 3. Implement

- Procurement strategies aligned to 2CRF 200 and FEMA funding requirements
- Disaster readiness strategy with action steps
- Standby contracts for essential services
- Tools for response coordination and communication

### 4. Monitor and Notify

- Policy, personnel, or operational changes affecting your plan
- Trends and regulatory updates
- Annual plan updates and team refreshers
